This report is prepared by Lockheed Electronics Company, Aerospace Systems Division, under contract NAS9-12200, Project Work Order 63-0497-8315, issued at the Lyndon B. Johnson Space Center, Houston, Texas.

The PTD Skylab-3 Handheld Imagery Catalog is oriented by Magazine and Frame Number to facilitate imagery tracking and provides a summary of features visible for each photograph. Imagery researchers require the opposite; i.e., given: state, country, or other feature name; find which images contain the given feature. The data contained herein has been sorted by Geographical Feature Names to assist imagery researchers.

I. INTRODUCTION

This publication represents a relisting of the Skylab-3, PTD Handheld Photography Catalog. The purpose of this publication is to provide imagery researchers a supplement to the PTD Catalog by alphabetically sorting together all similar major and minor features. Some cross-referencing of feature names was accomplished where the authors deemed necessary; however, no attempt was made to exhaust all possible means of cross-referencing. An example of the cross-referencing which was done: "Capri Island" may be found under the major feature column and also as a minor feature of "Islands."

II. WORK PERFORMED

The data contained herein was thoroughly researched using the Times Index-Gazetteer of the World, the Times Atlas of the World, and the National Atlas of the United States of America to ensure correct spelling and location of named features. The spelling and major geographical features applied to smaller features (minor) such as cities, towns, mountain peaks, etc., are in accordance with these publications. It is understood that some political boundaries and names of countries are subject to change. The data was written on NASA keypunch transmittal sheets and punched into data cards. These data cards were then machine sorted alphabetically by major feature and minor feature and printed by other Electronic Accounting Machines.

III. ABBREVIATIONS AND ACRONYMS

ATM	Apollo Telescope Mount
EVA	Extravehicular Activity
MAG	Magazine
MSN	Mission
PTD	Photo Technology Division
SLA	Solar LM Adapter
SSR	Soviet Socialist Republic
Terminator	Zone on the Earth's surface separating darkness and daylight
USA	United States of America
USSR	Union of Soviet Socialist Republics
